

Additional Specifications

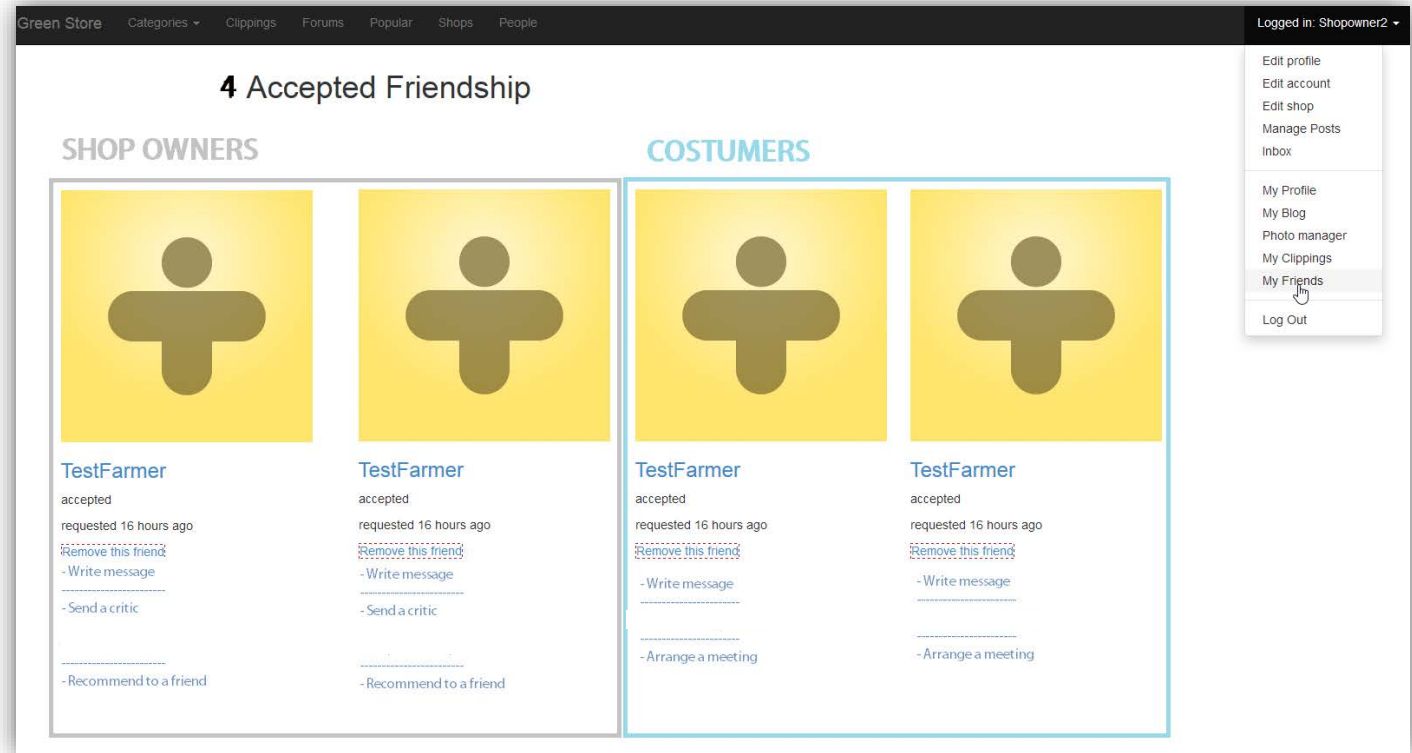

- Additions to “Friends” Page
- Better “Popular” Page
- Rating System for Users and Posts
- Minor additions

- The “MyFriends” Page should be improved:
- The group “shop owners” and “costumers” should be displayed separately, but on the same page.
- Shop owners can be wrote a message, or proposed a collaboration (**leave that without a function behind it for the moment**)
- -----
- With your Customer-friends, they only can be sent a message

THIS IS THE FRIEND LIST IN THE VIEW AS A CUSTOMER!! THIS VIEW DESCRIBES THE RELATION CUSTOMER – SHOP OWNER AND CUSTOMER - CUSTOMER

- The “MyFriends” Page should be improved:
- The group “shop owners” and “customers” should be displayed separately, but on the same page.
- Shop owners can be wrote a **message**, or sent a **critic**
- Also shop owners can be **recommended** to a friend (customer)
-
- With your Customer-friends, you can send them a **message** and **arrange a meeting**

„Recommend to a friend“ function

- This can be realized very easily. Just modify the “send a message” function, so that it looks like this (Preset values):

Compose message

To

~~testuser~~test x

Subject

I discovered this awesome shop you might like as well

Message

Check out this shop [URL of the shop will be put automatically here]

See you soon!

CommunityEngine Rocks!

Compose message

- This can be realized very easily. Just modify the “send a message” function, so that it looks like this.
The Subject should be a dropdown menu with preset values.

To	<input type="text" value="ShopXY"/>
Subject	<div><div></div><div>Hygiene Staff / Friendliness Food Quality Organization / Opening Times</div></div>
Severity	<div><div></div><div>I expected something else Below expectations Disappointing Crucial issue</div></div>
Message	<div></div>

Send

Arrange a meeting function

- This would be a new function that allows a Customer to invite another Customer to meet at a Shop Owner store. Only implement this function, when it is not too time consuming.
- Only Costumers can invite Costumers TO a shop owner

INTRODUCTION OF POINTS SYSTEM

- A new point system should be introduced, for every member.
- So generally, points should exist for each Shop owner **as well** as for each Customer. Also points exist for individual **posts**.
- All users see their own points on the upper right section of the navigational bar. They are visible all the time. The points in the navigation bar compose itself out of the points users get with their postings as well as from other actions they do in the community.
- After signing up you receive 10 points (start value)
- The table on the right shows how the rewards are called for the users after receiving a certain amount of points. They are just for “fun” and don’t fulfill a further purpose.

100 Points		INTERMEDIATE
250 Points		EXPERT
500 Points		PLATINUM MEMBER
1000 Points		GOLD MEMBER

INTRODUCTION OF POINTS SYSTEM

- In which places will the points be earned?
- There should be a voting mechanism for products/posts, which will increase the points:
 - **Each Product** of the Shop owners should have a rating functionality, registered users can either vote “Like”, “Super Like” or “DISLIKE”
 - A “Like” will add 2 Points to the shop owners points
 - A “Super Like” will add 4 Points to the shop owners points
 - A “Dislike” will subtract 2 Points from the shop owners points.
 - In addition, there is also a LOCAL rating bar for each product.
 - Pressing the “Like”, “Super Like” or “DISLIKE” buttons therefore will add the corresponding points to the local like bar and the global like bar. Each user only can vote once per product, for either “Like” , “Super Like” or “DISLIKE”

INTRODUCTION OF POINTS SYSTEM

- In which places will the points be earned?
- Also “Customers” can make Posts.
For these the exact same method applies as for the shop owners.

Save Changes

- Plus they can gain 2 Points for recommending a shop to a friend and 4 Points for creating an appointment with friends (arrang a meeting function)
- Plus 1 Point for writing a post in the forum

Popular Page

[Green Store](#)[Categories ▾](#)[Clippings](#)[Forums](#)[Popular](#)

- 1) Should only display all posts of friends (shop owner products and customers posts)
- 2) Still should be sortable for „most popular“ and „most recent“
- 3) Popular then can be renamed „My Friends posts“

Return of „What's fresh“

- 1) It would be nice to have a “What is new?” Newsfeed, but only containing the news of the activities of the connected friends (applies to shop owners and customers)
- 2) Only one exception: When new people join the System, it should be in the Whats Fresh List.
- 3) The “WhatsFresh” should appear on the homepage on the bottom of the page:

What's fresh

[+ See all activity](#)

Search Map on the homepage

- 1) The Shops in the speech bubble should be linked so that they are clickable (leading to their profile)
- 2) The Star Rating of the shop should be displayed on the side if this is not too much work to realize.
